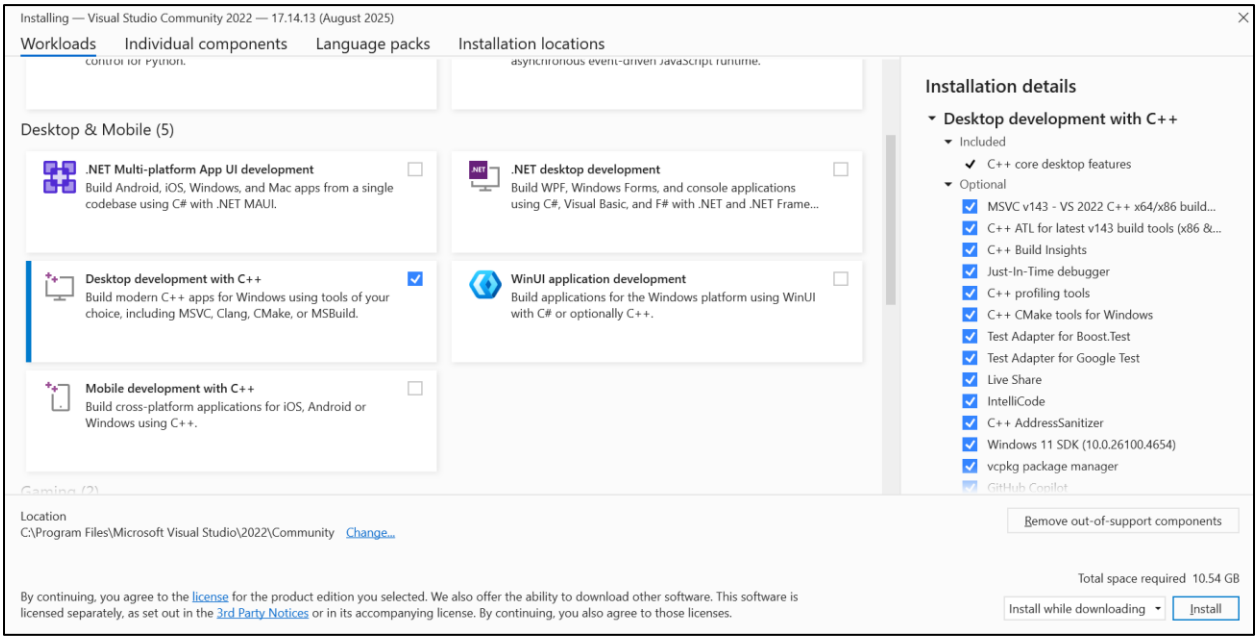
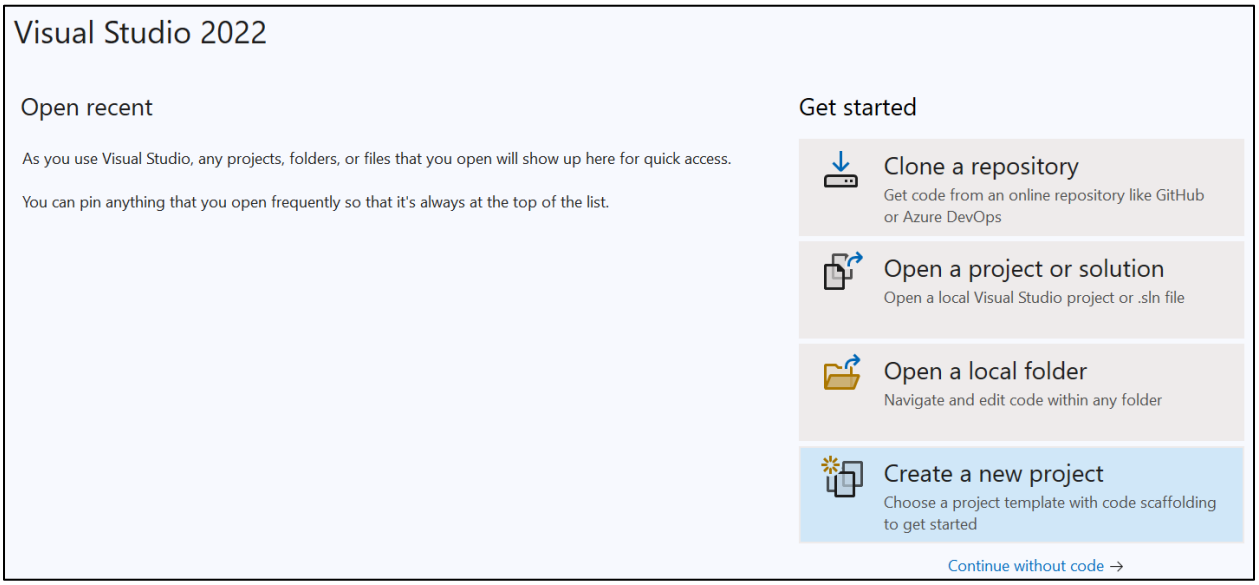
Setup Visual Studio 2022 Community Edition (or Enterprise Edition)

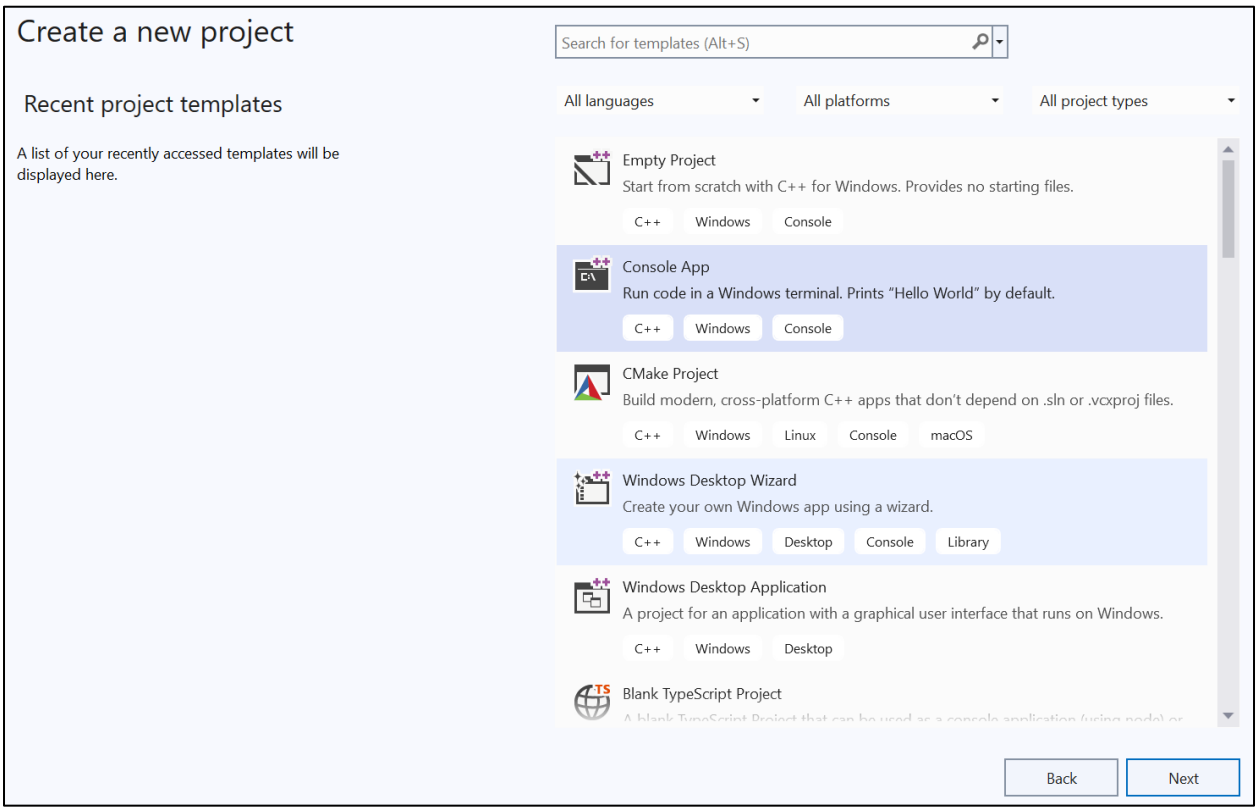
1. Go to the Visual Studio website (Visual Studio & VS Code Downloads for Windows, Mac, Linux) to download the Community Edition.
2. Once downloaded, run the setup file.
3. Select only the "Desktop development with C++" workload (see screenshot below) then click on the "Install" button.



4. Once installed, open up the program then click on "Create a new project".



5. Select “Console App” then click on the “Next” button.



6. You can now start working on the lab exercises!

7. Remember when debugging to change the settings to “x86” mode otherwise your program will not compile.
